ECOLOGY AND EVOLUTION

Shigeno, Shuichi, Takenori Sasaki, and Gerhard Haszprunar
Central nervous system of *Chaetoderma japonicum* (Caudofoveata, Aplacophora): implications for diversified ganglionic plans in early molluscan evolution 122
Clavico, Etiene E. G., Allan T. De Souza, Bernardo A. P. Da Gama, and Renato C. Pereira
Antipredator defense and phenotypic plasticity of sclerites from *Renilla muelleri*, a tropical sea pansy ... 135
Jost, Jennifer and Brian Helmuth
Morphological and ecological determinants of body temperature of *Geukensia demissa*, the atlantic ribbed mussel, and their effects on mussel mortality 141
Strathmann, Megumi F. and Richard R. Strathmann
An extraordinarily long larval duration of 4.5 years from hatching to metamorphosis for teleplanic veligers of *Fusitriton oregonensis* 152

NEUROBIOLOGY AND BEHAVIOR

Pechenik, Jan A., David E. Cochrane, Wei Li, Emily T. West, Anthony Pires, and Maia Leppo
Nitric oxide inhibits metamorphosis in larvae of *Crepidula fornicata*, the slippershell snail 160
Hatakeyama, Dai, Hitoshi Aonuma, Etsuro Ito, and Károly Elekes
Localization of glutamate-like immunoreactive neurons in the central and peripheral nervous system of the adult and developing pond snail, *Lymnaea stagnalis* 172
Hemsworth, Robert, Wil Villareal, Blair W. Patullo, and David L. MacMillan
Crustacean social behavioral changes in response to isolation 187
Horiguchi, Hiroko, Mantaro Hironaka, Victor Benno Meyer-Rochow, and Takahiko Hariyama
Water uptake *via* two pairs of specialized legs in *Ligia exotica* (Crustacea, Isopoda) 196

No. 3: December 2007

THE NEUROECOLOGY OF CHEMICAL DEFENSE

Zimmer, Richard K., and Charles D. Derby
Biological Bulletin Virtual Symposium: the neuroecology of chemical defense 205
Zimmer, Richard K., and Ryan P. Ferrer
Neuroecology, chemical defense, and the keystone species concept 208
Paul, Valerie J., Karen E. Arthur, Raphael Ritson-Williams, Cliff Ross, and Koty Sharp
Chemical defenses: from compounds to communities 226
Glendinning, John I.
How do predators cope with chemically defended foods? 252
Conner, William E., Kerensa M. Alley, Jonathan R. Barry, and Amanda E. Harper
Has vertebrate chemesthesis been a selective agent in the evolution of arthropod chemical defenses? 267
Derby, Charles D.
Escape by inking and secreting: marine molluscs avoid predators through a rich array of chemicals and mechanisms 274
Weinberger, Florian
Pathogen-induced defense and innate immunity in macroalgae 290

RAPID COMMUNICATION

Page, Louise R.
Novel embryogenesis in a nudibranch gastropod: segregation, expulsion, and abandonment of deeply pigmented egg cytoplasm 303

ECOLOGY AND EVOLUTION

Martin, Rainer, Sabine Hild, Paul Walther, Kerstin Ploss, Wilhelm Boland, and Karl-Heinz Tomaschko
Granular chitin in the epidermis of nudibranch molluscs 307

DEVELOPMENT AND REPRODUCTION

Lloyd, Michelle J., and Louis A. Gosselin
Role of maternal provisioning in controlling interpopulation variation in hatching size in the marine snail *Nucella ostrina* 316
Troedsson, Christofer, Philippe Ganot, Jean-Marie Bouquet, Dag L. Aksnes, and Eric M. Thompson
Endostyle cell recruitment as a frame of reference for development and growth in the urochordate *Oikopleura dioica* 325

* * *
